## Sacramento Valley Spring 1997 Groundwater Elevation

- Sacramento Valley Groundwater Basin Boundary
- Redding Groundwater Basin Boundary
- Sub-Basin Boundary
- 20' Groundwater Elevation Contour
- 10' Groundwater Elevation Contour

**Notes:**

- Contours based on Spring 1997 groundwater level measurement by the Department of Water Resources and cooperators.
- Groundwater elevations are based on National Geodetic Vertical Datum 1988 (NGVD 88).
- Groundwater elevations represent mixed aquifer conditions (confined, unconfined, and composite). Thus, location of groundwater contours should be considered approximate.
